

Adding a product.

Copy a Product

Duplicate a print that uses the same format by clicking “duplicate” on the product page.

Alter the title of the page with the product title. Then update the link to the product page by clicking on the “Edit”  button to the right of the link text and pasting in the new title. WordPress will clean up the link to make it web friendly after you click “OK”.

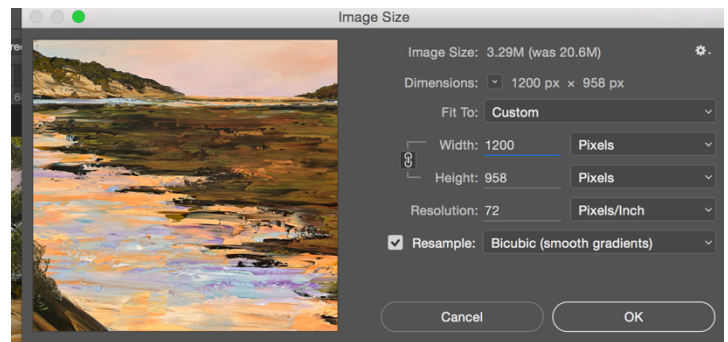

Remove the old product image and add your own.

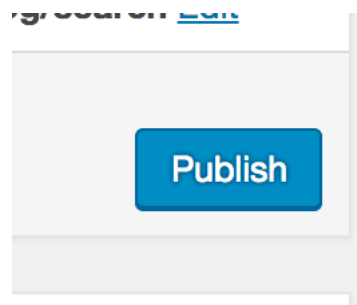

Prepare Image for Upload

To Prepare images for the site ensure the images are not too large there is a 2mb limit on uploads to the site. Photos used for the prints will be HUGE. Reduce them using a photo editing program like PhotoShop to no more than 1400px wide and a resolution of 72 DPI.

Save the file as a **JPG**. *TIF, PNG, GIF will not work as well as JPG.*

Publish Your Product

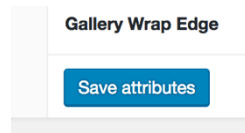

Adding/Editing a product.

Start with copying an existing product. Then edit the title, link and product image. Then click on the “Attributes” tab below the first post edit window.

Editing Sizes

Under the “attributes” tab click on sizes. Remove the sizes that don’t suit the product. By clicking the x next to the tag. Then add the size you want by selecting the size from the dropdown.

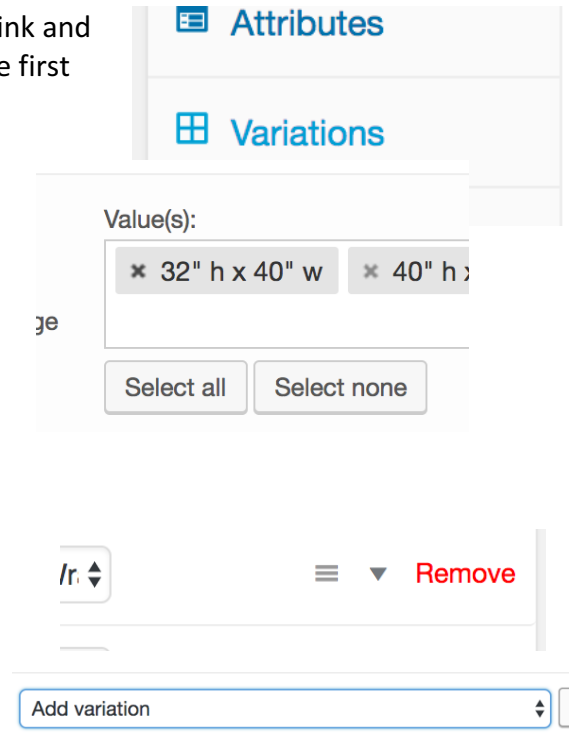

Then hit “save attributes”

Editing Variations

Under the “variations” tab, remove the older variations.

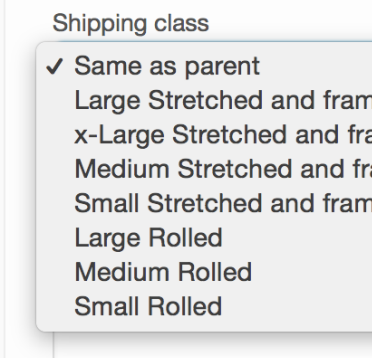

Add the new variations. Click Go for each variation (#of finishes(3) x #of sizes available(2) for the product).

Set the default form values so the page is prepopulated with the high-end product.

Set up each variation

Click on a variation and add an appropriate shipping class. This will add a cost from shipping to each product depending on its variation

Add price and a variation description
